

STREET SAFE DEFENSE:

Firearms Training Program, Temecula, CA

Owning a firearm and being able to defend yourself and your loved ones is your Second Amendment right. However, owning a firearm when you do not know how to safely handle or fire one, is analogous to driving a car without ever having learned any driving skills. Both can be dangerous liabilities in the hands of the uninformed and inexperienced.

Enter Temecula's own premiere firearms and self-defense training institute, Street Safe Defense®. The Street Safe Defense® program is a division of the nationally renowned forensic and law enforcement training and consulting firm of Martinelli & Associates, Justice & Forensic Consultants, Inc. This company of nationally recognized experts in forensic investigations and firearms has provided the law enforcement and civilian communities with outstanding training since 1980.

The male and female instructors at Street Safe Defense® who come from law enforcement and military backgrounds are masters in the arts of self-defense and firearms. They are highly skilled, knowledgeable, supportive and very patient with novices to firearms; all the way up to experienced shooters. They specialize in working with a diverse clientele of young, senior, male and female shooters.

The Street Safe Defense® program produces basic, intermediate, advanced firearms and home safety classes. They also produce the CA Carry Concealed Weapon (CCW) permit class, approved by the Riverside County Sheriff's Department; as well as the AZ + 34 states CCW permit class. They even have an excellent Basic Firearms & Safety Course just for women.

Classes involve a combination of morning lecture in Temecula and an afternoon practice and firearms qualification session at the Duncan Range in nearby Rainbow. Real-life examples from the field are peppered throughout the discussion portion of the course and help to provide valuable direction and advanced planning of how to avoid a potentially dangerous situation. Self-defense, handgun basics and basic shooting are discussed, with an emphasis on safety.

Whether you are looking for basic or advanced training, the experienced professionals at Street Safe Defense® are a direct hit!

JUST FOR HER

“Since I don't own a gun, I borrowed a 9mm Glock from a friend on the day of class. Surprisingly, I didn't feel like Angelina Jolie when I picked it up... I felt a little hesitant: not quite as brave or confident as I thought I would be.

The Street Safe Defense course was an eye-opener for me. I tend to live life with a bit of naiveté, so I was shocked to discover that about 80% of the women in my class had been assaulted or had a near encounter with a dangerous situation. Seeing real faces of victims right in front of me, from my very own city, was more powerful than any news story on TV.

The class was comfortable, with women of all different ages and backgrounds. From the grandmotherly woman who had owned a gun for 35 years but was uncomfortable handling it to the barely-over-18 college student who was a brand new gun owner, I felt comfortable in a setting of just women.”
